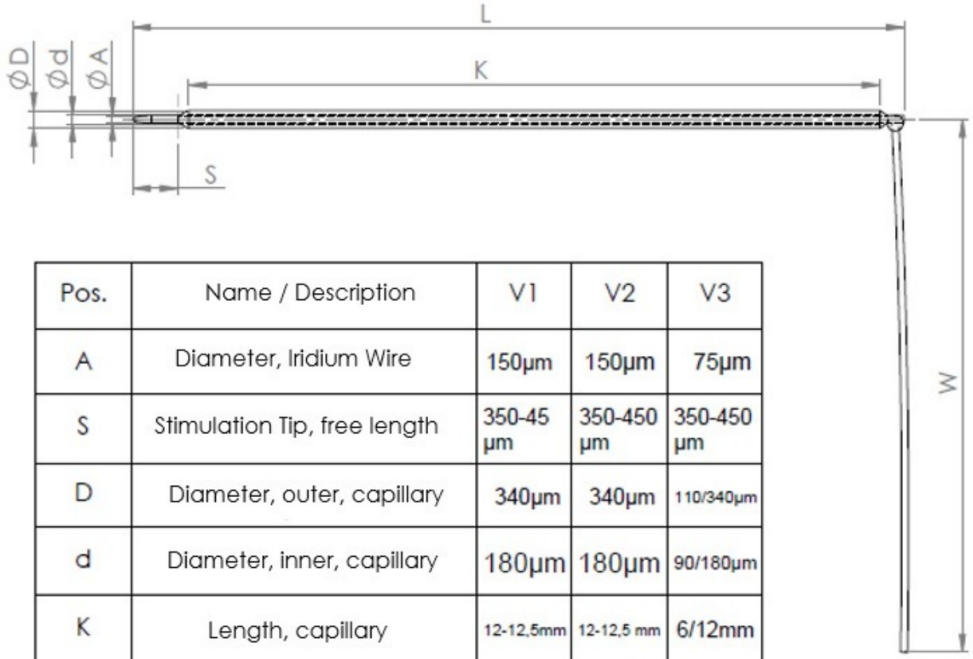
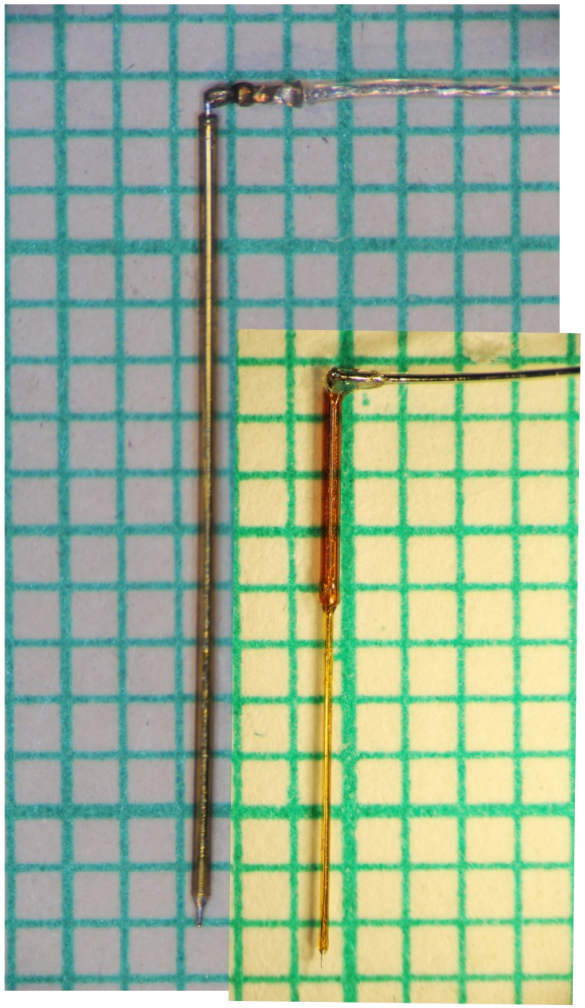
Supplementary electrode

A



Pos.	Name / Description	V1	V2	V3
A	Diameter, Iridium Wire	150µm	150µm	75µm
S	Stimulation Tip, free length	350-45 µm	350-450 µm	350-450 µm
D	Diameter, outer, capillary	340µm	340µm	110/340µm
d	Diameter, inner, capillary	180µm	180µm	90/180µm
K	Length, capillary	12-12,5mm	12-12,5 mm	6/12mm
L	Length, total, electrode	14,0-14,5mm	10,0mm	10,5mm
W	Length, total, lead-wire	22-23mm	22-23mm	22-23mm

B



(A) Stimulation electrode drawings and dimensions of different electrode versions V1 - V3. (B) Photos of the electrode versions we used to realize dimension differences, V1 (left) and V3 (right).
